LD CLOUD FOR STARTUPS · APPLICATION

HostelPalika

The operating system Nepal's hostels run on.

By Softmato Technology Pvt. Ltd. · Registered 19 August 2026 · hostelpalika.com · Android app on Google Play

THE COMPANY

Softmato builds for Nepal

Our first product, **HostelPalika**, takes a hostel's whole day off paper and WhatsApp and puts it on one platform.

Built in Nepal for Nepal: Bikram Sambat billing, eSewa and Khalti payments, and screens in the plain words hostel staff already use.

THE PROBLEM

Hostels still run on paper and WhatsApp

Students and guardians

Find a hostel through word of mouth, unverified Facebook posts and walk-ins. No fair way to compare price, food or safety.

Hostel owners

Residents, rent, food and complaints sit in notebooks, WhatsApp groups and spreadsheets that nobody shares.

Wardens and staff

Night checks, rent follow-ups, cash and kitchen stock with no shared record and no history.

THE PRODUCT

One platform for everyone in the hostel

Public site

Students search, compare and apply to verified hostels.

Owner portal

Owners and wardens run rooms, rent, food, staff and stock.

Resident app

Bills, online payment, food menu, notices and SOS.

Guardian view

Parents see fees and safety, never the student’s location.

Cook app

One tap tells every resident the food is ready.

Platform admin

We approve, verify and bill every hostel on the platform.

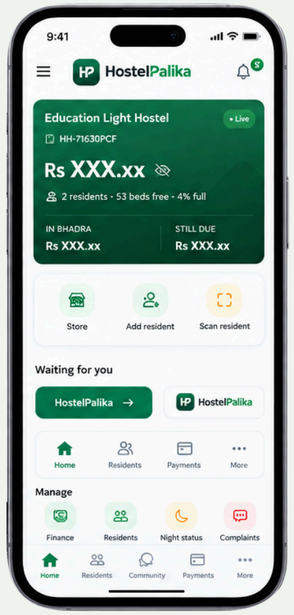

THE APP

The real app, in use today

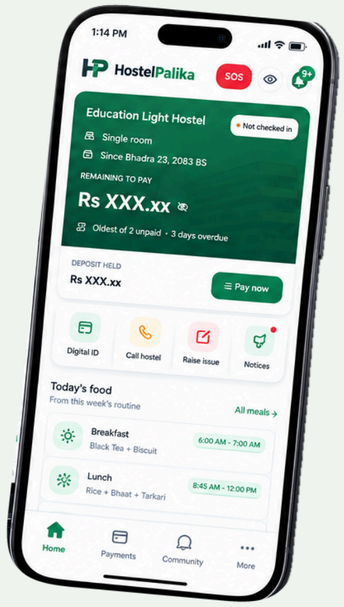

Students

Search hostels by city, price and distance

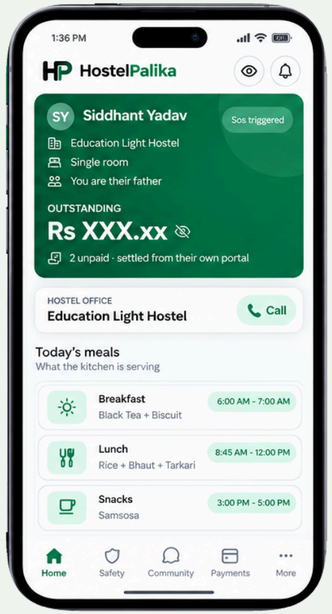

Owners and wardens

This month’s money, free beds and what’s waiting

Residents

Rent, digital ID card, today’s food and SOS

Parents

Fees, today’s meals and a call to the hostel

LIVE TODAY

Built for how Nepal’s hostels work

- Rent bills on the Bikram Sambat calendar
- Late fines and khata on the next bill
- SOS alerts that reach staff instantly
- Maintenance requests with voice notes
- Receipts anyone can verify by QR
- Hostel KYC with a signed agreement
- eSewa and Khalti payments, reconciled
- Night attendance and status prompts
- Weekly food menu and cook alerts
- QR admission forms and ID-card scanning
- Stock and staff cash across branches
- Push alerts on Android and the web

Web portals, an Android app and an installable web app — all on one backend.

ECOSYSTEM

One ecosystem around every hostel

Students and parents
Find, compare and apply

Owners and wardens
Run the whole hostel

Residents and cooks
Pay, eat, check in, get help

Payments
Rent goes straight to the hostel's account

Another Softmato app, one tap away

TRACTION

Launched, live and growing

Jun 2026	Platform build begins
19 Aug 2026	Softmato registered
Sep 2026	hostelpalika.com live in production
Sep 2026	Android app on Google Play
Oct 2026	Self-serve sign-up and referrals
Oct 2026	**15 hostels registered**

> *“The platform is good, helpful and simple to use.”*
>
> **Ekata Girls Hostel**

15

hostels registered since launch, with a strong response from owners

Live

Android app on Google Play

6

portals on one backend

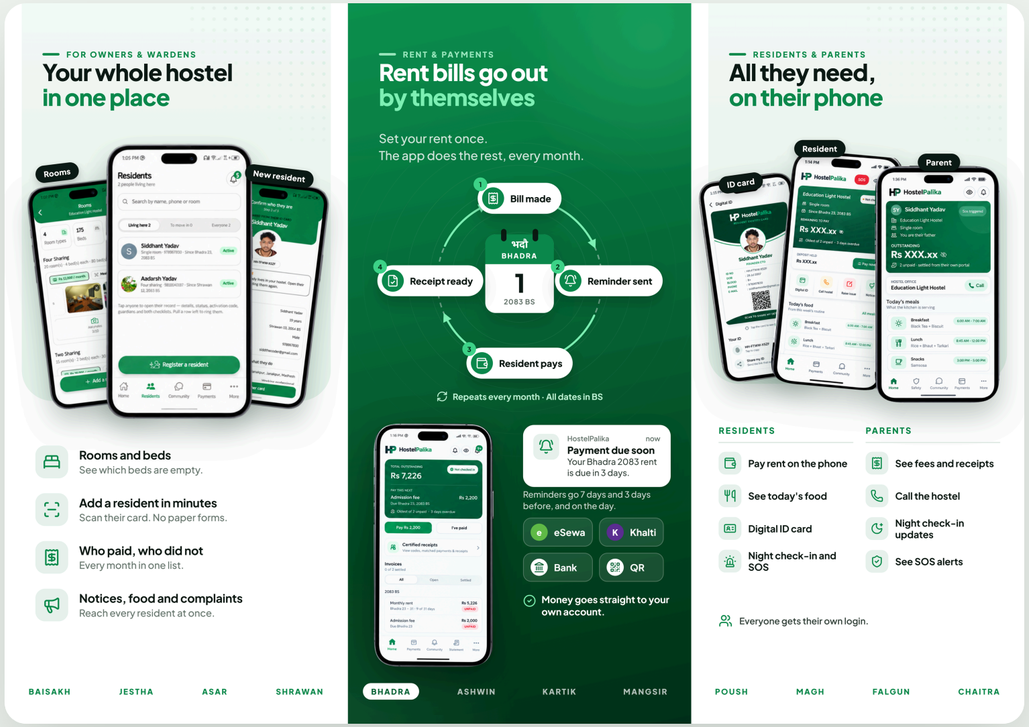

GO TO MARKET

Next: going wide, city by city

15 hostels in and a strong response. Now we take HostelPalika to every hostel area, one city at a time.

- Referral partners paid per hostel
- Field team that onboards on the spot
- Printed pamphlets for hostel visits
- Short promo films for social media
- City pages that rank on Google
- Android app on Google Play

Going wide multiplies the load — that is why we are applying.

Our printed pamphlet for hostel visits

BUSINESS MODEL

How HostelPalika earns

Monthly plan

Rs 999 – 2,499 / month

Go, Pro and Max, by hostel size. Max adds branches. Billed on the web.

Free to join

No setup fee

Sign up in three fields. Hostels pay only for their plan.

Supply store

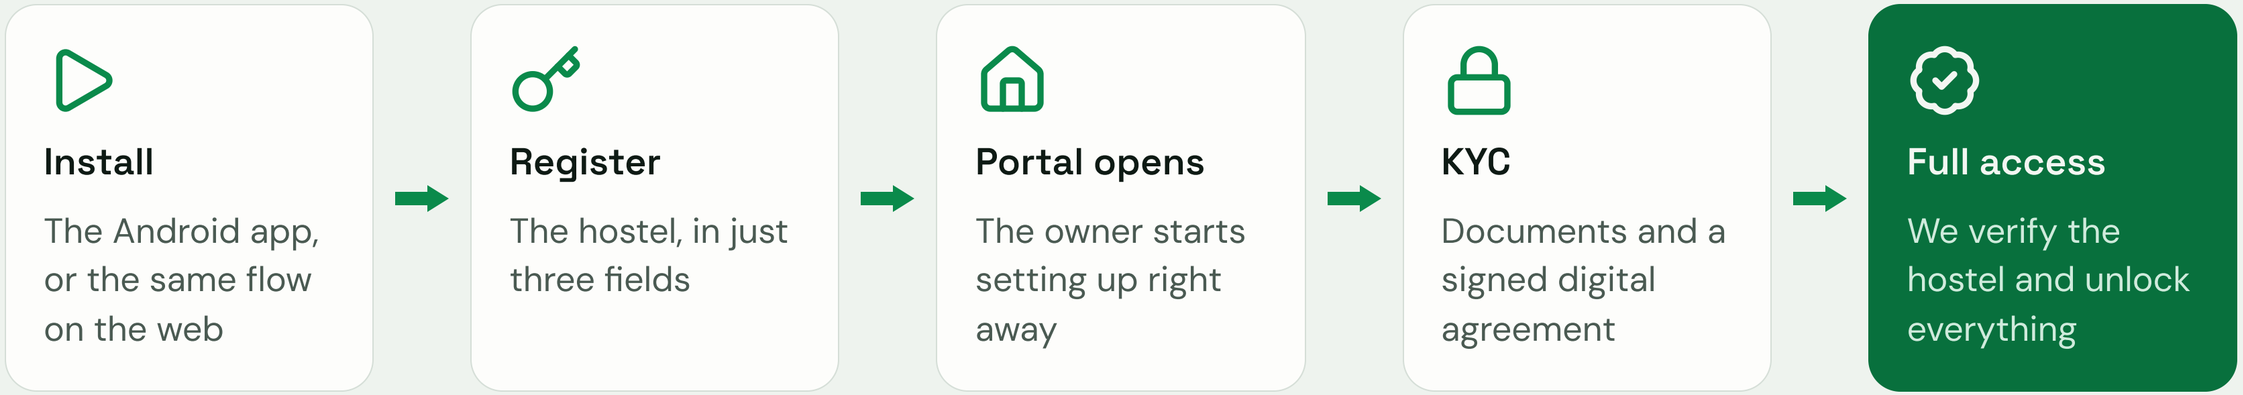

Cash on delivery

Hostels order kitchen and cleaning supplies from us inside the portal.

Growth: hostel and partner referral codes bring new hostels in without a sales team.

ONBOARDING

How a hostel joins, with no sales call

3 fields
to register a hostel

Rs 0
setup fee

App + web
the same flow on both

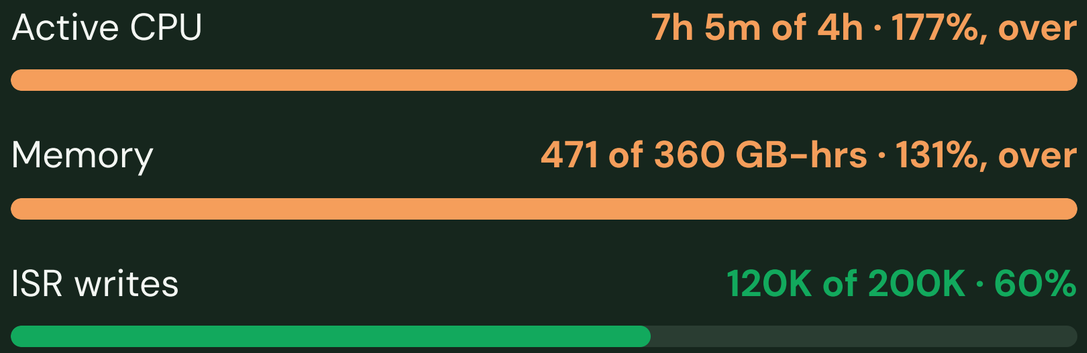

KYC keeps fake hostels off the platform: every verified hostel is a real business.

CLOUD NEED

Free tiers ran out, in production

Vercel paused our team on 5 October 2026

Hobby fair-use limits, last 30 days. Deployments stay paused until we move.

Source: Vercel usage dashboard, 25 October 2026

The API runs on serverless
Every app request burns the CPU limit that got us paused.

Rate limits don’t hold
Each serverless copy counts alone; we need one shared Redis.

Reminders on a free cron
Rent and plan reminders depend on an outside free service.

Running on a borrowed account
We moved production there to stay online after the pause.

CLOUD NEED

What we'll run on LD Cloud

One LD Cloud instance

2 vCPU · 4 GB RAM

Redis
Cache, shared rate limits, job queue
Now

Cron worker
Rent and plan reminders, push notices
Now

HostelPalika backend (NestJS)
The API for the web portals and the app
Next

Each service runs in its own Docker container.

We're early-stage, so we start lean: one instance carries everything we need today.

- **Containers from day one**
  Each service is easy to move, restart or scale.
- **The backend joins next**
  Our NestJS API moves onto the same instance.
- **We stay after the credits**
  We continue on LD Cloud's paid plan with this instance.

THE PLAN

The path to production

Each step starts when the one before it is live. After the credits, we stay on LD Cloud’s paid plan.

1

Set up the instance

2 vCPU and 4 GB on LD Cloud, with Docker ready.

2

Redis in a container

Shared cache and rate limits for every request.

3

Cron in a container

Reminders move off the free outside cron.

4

NestJS backend

Our API moves off serverless onto the same instance.

5

Monitor and load-test

Alerts, uptime checks and load tests on real traffic.

6

Launch city by city

Field team and partners onboard hostels at scale.

THE ASK

Credits to take HostelPalika to production — and to every city.

≈ NPR 2,900

a month (about NPR 35,000 a year) for our 2 vCPU / 4 GB instance

12+ months

of credits, as much as the program allows

100%

on our own workloads: HostelPalika and softmato.com

After the credits, we pay for this instance ourselves.

First-time LD Cloud customer · one allocation for Softmato Technology Pvt. Ltd.
